<1 hr	40%	5+
for a recurring reporting task that took about 4 hours, using reusable templates	less time to produce daily reconciliation reporting for 10+ global investment clients	dashboards and reports for senior Library leadership, client groups and third-party stakeholders

Summary	Data and BI analyst with 4+ years across higher education and financial services, and over a year of continuous New Zealand experience. I build the reporting layer between messy source systems and the people who need answers, in Power BI, SQL and Excel, and publish it through SharePoint to the teams who use it.

Experience	Technology Services & Collections Analyst University of Waikato Library, Hamilton · Jul 2026 – present • Built a privacy-conscious API reporting workflow, now in production with monthly runs and fortnightly reporting, that turns booking and questionnaire data into reusable analytical tables and excludes personal student contact details • Cut recurring reporting work that previously took days to a matter of hours by automating data preparation and standardising templates • Cleaned, joined and validated data from multiple Library systems in SQL into analysis-ready datasets and Power BI reporting models • Consolidated three Library registers (Services, Technical Solutions and Integrations) into one searchable HTML dashboard giving leadership a single view of systems, ownership and integrations • Used Google Analytics 4 across two Library web properties to show where users came from and what they used, informing resource-spend decisions • Published every dashboard and report through SharePoint, each to the site of the team or stakeholder group it serves Student Assistant, Library (Collections Strategy & Access) University of Waikato, Hamilton · Jul 2025 – Jun 2026 · part-time • Built operational Power BI dashboards tracking throughput, backlog, ageing and exceptions for reading-list processing of about 80–150 items a week at peak • Applied DAX measures and Power Query transformations to standardise fields across multiple source systems and make them reporting-ready • Designed QA controls catching incorrect editions, duplicate entries, invalid URLs and access errors earlier in the process Sessional Assistant, Economics University of Waikato, Hamilton · Jan 2026 – Jun 2026 · sessional • Facilitated tutorials for diverse postgraduate cohorts, translating economic theory into practical business applications and structured problem-solving approaches Consultant, Data Operations & Client Solutions Arcesium (a D.E. Shaw Group company), Gurugram · Mar 2022 – Jun 2025 • Investigated and resolved 10–20 reconciliation exceptions a day across cash, positions and P&L, tracing data lineage to root cause and driving fixes through the correct operational owners • Wrote SQL daily across SQL Server and MySQL for reconciliation logic, exception analysis, extracts and reporting for 10+ global investment clients • Built operational Power BI dashboards providing visibility into break trends, workflow health and reporting status • Supported client onboarding and data-migration workstreams, working directly with clients and counterparties on requirements, analysis and project coordination • Managed multiple concurrent client workstreams end to end: requirements, build, test, release and ongoing support
